

# Lessons in Percentages

**Mushiba:** During this time of accelerated activity, there are times when we can feel overwhelmed by the lessons we have taken on for this life ~ and, that we will never learn what we are *supposed* to learn because the acceleration seems so intense. We often place pressure on Self to *hurry up* and learn and then feel frustrated when we think we have still not learned enough.

Waith has given us much information about the time it takes to learn, and during his series of classes, *Search for Self ~ First Level*, Waith said:

**Waith:** *“There is no energy who comes onto the earth plane who starts and finishes a complete lesson in one lifetime ~ it simply does not happen.”*

There is great joy in the knowledge that we can take as long as we need to learn our lessons ~ we are not on a time schedule. Indeed, Waith has said that we are not allowed to take on One Hundred Percent of any lesson for one lifetime ~ we must break it into *Percentages of Learning*, such as .10% for one lifetime or even a series of lifetimes.

Take a deep breath and feel comfort in knowing that we learn as we need to learn and there is no pressure from The Universe to do so ~ it is only Self who imposes such restrictions on Self. And, Waith’s famous quote about lesson learning is, *“It takes as long as it takes”*.
