

Aliens Among Us Or, Interdimensional Travel?

Mushiba: Early in my life I believed that everything is a form of life and has its own form of intelligence and that there must be intelligent life elsewhere in The Universe. I simply could not understand the arrogance of people who thought that there was no other life, let alone intelligent, anywhere except in humans on Earth.

In an early Waith Public Session, he was asked about UFOs and aliens:

Question: “I have been reading about Star People, as well as other books about aliens. Are there aliens here on earth?”

Waith: *“There are many dimensions that are not of the earth plane and there are many planets that are part of the earth plane ~ Planet Earth being one of many levels of the earth plane existence ~ and, on each of these manifestations are energy forms. Depending on circumstances, evolvment and attunement, energy forms are allowed to come into other planets and dimensions, for lessons to be learned. This has been occurring since the beginning of time and is a natural process that helps in the advancement and evolution of all energy forms, be they on the earth plane or in other dimensions.*”

“The issue that you bring up must be taken in its proper perspective. There is nothing to be feared ~ there is not going to be any overtaking by aliens. That is not a Law of The Universe. The battle between the Light and the dark is the issue here and not the overtaking by aliens, which is a word, by the way, that we prefer not for use for it signifies an unconnectedness with others. Those who you would call aliens are, in fact, a part of The One and are not something different from, or apart from, each of you ~ they are simply from other dimensions coming in to learn and teach.”

The fascination with ‘aliens’ continues and will until a person gains the awareness that we are all One. We all come from the same source ~ whatever dimension we are in, concrete planet or not, and whatever form we take on. In the words of Mr. Spock: *“Live Long and Prosper.”*
