

A Basket Of Gold Light For The Earth

Mushiba: Our Earth is imbalanced. This is evident, globally, by the extreme weather, the social, technological, political and economic upheaval ~ the Earth is cleansing itself. And just as when each of us is cleansing, only we can do it, with occasional help from others. So too then, is the Earth in that position, and thus, we can provide help by sending Light to the Earth.

Waith has given us an easy and quick Focusing Tool meant to connect us with the Earth. In its simplicity it is meant to tell the Earth that we are a Basket of Gold Light:

Waith: “Envision that you are seated inside a basket ~ it is gold and filled with Light that you are emanating to Earth. Say to the Earth, ‘This basket of Gold Light from me will always be filled and you may take from it whenever you need it ~ you do not need to request it.’

“Now, give Unconditional Love to Earth and provide that Basket of Gold Light for whenever it is needed. The essence of Unconditional Love is not requiring that another ask you or thank you ~ simply that you are there as needed without any strings attached.”

The words, Terra Lux, come from the Latin meaning, *Earth Light*. Part of our mission is to help the Earth, from an energy perspective, as it struggles during this time of challenge and exaggeration. You can help the Earth ~ pretend you are sitting in a beautiful Basket of Gold Light and allow the Earth to take the Light when needed! And as Waith said to us so many years ago, *“May the Earth Light be with You!”*
