

Types of Spirit Guides

Mushiba: When we journey outside of The Universal Consciousness, we are not alone nor without assistance because we have Angelic Protectors and Spirit Guides. When I was first introduced to the concept of Spirit Guides, I was in awe ~ here were special energy forms who just floated around in some type of ether giving advice, or so I thought!

I now understand that Spirit Guides are learning their own lessons as they guide. Here is how Waith dispels the myth about Spirit Guides:

Waith: *“Spirit Guides fall under many categories. Some have completed their sojourn on the earth plane and some have not. Those who have completed their sojourn on the earth plane may now be working in other dimensions, on other training grounds, and able also to devote their learning in Guide School and are, perhaps, at the graduate level of Guide School.*

“Many Spirit Guides have gone into Guide School without having yet completed their sojourn on the earth plane ~ they may be nearing completion and are able to go in as apprentices. Thus, they may be a guide to you while still having work to do on the earth plane.

“Also, there are Spirit Guides who have never come onto the earth plane. They are assigned special types of missions that relate to issues you may not be involved in ~ or, they assist you in spirit types of situations. Spirit

Guides, when they have attained a particular level of Guide School, are able to manifest at will on the plane ~ as many of them do, and, as many of us from The Angelic Kingdom do so often.”

Waith has told us that as we learn, we must then assist another who is trying to learn what we have learned. Thus, we are all guides, at least informally. Guide School is the dimension that simply makes the function formal ~ and is available to any energy who wants to select it as part of their Menu of Lesson Learning.
