

# Understanding The Universal Vibrational Line

**Mushiba:** *“Everything is energy which vibrates”* is a statement found in the literature of quantum physics as well as the Waith transcripts. Physics gives us the concrete part of energy and vibration and Waith gives us the abstract part. Waith also connects abstract energy and its vibration to the learning of lessons:

**Question:** “You have said that everything that happens is meant to happen. However, the issues of the Earth’s environment really affects me. I feel sometimes like a neurotic when I go with my brown paper bag that I recycle, and think about what impact it has.”

**Waith:** *“You also have your role in what occurs. You have all taken on particular lessons, and that are directly related to the other lessons that other entities have taken on. One entity would simply say, ‘That is all meant to happen,’ and not respond because that lesson was not taken by that entity as one to deal with in this lifetime. Another entity would respond as you would with your paper bags ~ or other things.*

*“This is all meant to be. There are enough entities who have taken on particular lessons throughout the earth plane that, whether or not it has what you would see as an impact, is not the issue, and yet, that it does have a direct impact somewhere down The Universal Vibrational Line.”*

I believe that The Universal Vibrational Line is simply the overall strategy that The One has mapped out so all the lessons that have been chosen by us are duly represented in packaging that is appropriate for the path each entity has in this life. Whew ~ talk about a scheduling challenge! With that in mind, I believe that the 'Scheduler' needs us to continue to *Focus on Lightheartedness and the Spreading of Light!*
