FEBRUARY 13, 1999

SPECIAL TOPIC SESSION ~ THE ANIMAL KINGDOM SYMPOSIUM ~ PART I

Waith: Hello, hello, indeed, and a welcome addition to the gathering with Arietta, always a pleasure for her energy to be in the gathering, then of course, appropriate for The Animal Kingdom Symposium, indeed. (Arietta is an energy encased in dog form)

Well then, is the first question on your mind, "What exactly is a symposium?" 😊😊 What do you think it means?

A gathering.

Yes, it is a gathering.

We get together, you would not want to lecture, or some other word like that, a gathering together.

Very good ~ fancy word for gathering.

I don't know, I am sure it's probably Latin or something!

We happened to like the word. When we went into the vocabulary of Mushiba, we found that word, like you would go into a dictionary. That is what we do, we go in and we look up words. We liked that word. We liked the word Convocation also, so we used that for the Spiritual Leadership discussion. We just put that word in, it gives it fullness, you see.

We are here to talk about The Animal Kingdom. That is what our plan is. Why would we want to focus on The Animal Kingdom, do you think?

Because of their connection to us?

That is certainly one reason ~ as a kingdom, they have a very, very strong connection to The Human Kingdom. All of the kingdoms of course have connections to each other, and some have greater connections than others. The Animal Kingdom has a very strong connection ~ The Mineral Kingdom is another kingdom that has strong connections to The Human Kingdom, as well as The Animal Kingdom.

Any other reasons, do you think, that we would want to talk about The Animal Kingdom?

Because they are going through a very interesting change right now, evident in a lot of different ways, so that probably indicates to me that there is a huge role for them in the change into the next illusion.

Yes indeed, what kinds of changes do you think they are going through?

We just had a frog conversation recently. One of the things that comes to mind is a deformed frog, found everywhere, and the scientists are all wondering what is happening to frogs, that they are suddenly changing physically.

Indeed, deformed by the standards of this current illusion, but not deformed by the standards of The New Illusion, indeed. Any other reasons why we would want to be talking about The Animal Kingdom? What would be a basic reason to talk about anything?

It's fun.

It is fun, yes. Something to do. What else, though, why would we talk about anything?

To bring awareness and understanding of different kingdoms.

Yes, that is correct, to simply learn more about anything, any topic that you would want to discuss. You want to learn more about it, that it then gives you a higher level of awareness, as has very nicely been stated. So it increases your understanding of the connection, indeed, with The Animal Kingdom. Those of you who are gathered for this discussion, have very close relationships with The Animal Kingdom. They inhabit your lives, one way or another ~ sometimes by proxy. ☺ ☺

So then, let us look at some of the basic information and then we will have some exercises. Frank is going to come in and speak with you for a little bit. He, in the Waith and Company Mission, is primarily charged with the Community of Self. However, what he also is charged with is ~ in that aspect of the Community of Self ~ helping to create greater harmony within Community. And included in that, he has a special attraction to The Animal Kingdom. In his last time on the earth plane, he had a very strong affinity with The Animal Kingdom and is known for that affinity with The Animal Kingdom. So he will give you some insights and also answer some questions that you might have, particularly regarding the harmony of The Animal Kingdom.

So, let us begin with one first and important derailing, if you will, of a myth that exists on the plane, and that myth is that animals are lower than humans and the myth being that they are some type of subset, if you will, to humans. Indeed, humans think that they are superior to everything, and within The Human Kingdom, there is also the hierarchy of superior ~ groups of humans thinking they are superior to other groups of humans. It is the natural component of being human ~ it is part of the kingdom of being human to think that you are superior to everything, and especially to animals.

In this particular illusion that you are currently in, there is a tremendous amount of balancing occurring where the relationship between animal and human kingdom is concerned. The myth however, continues. Even among those who would call themselves enlightened, there is a residual still that says, "Well yes, we'll admit that they have souls, but there's something a little bit different about them, and if they are really good energies, they get to go into The Human Kingdom next.

In our early discussions of The Animal Kingdom, we made certain statements regarding the relationship of The Animal Kingdom that was meant to give, oh, not even a

kindergarten understanding, and actually played into the particular ideas that were evident at that point in time, indicating that The Animal Kingdom would evolve into The Human Kingdom.

In actuality, The Animal Kingdom can move into The Human Kingdom, if it so chooses, but not in any particular hierarchical order. There is no hierarchical order in the discussion of energy circles. We have made it quite clear that the order of movement from kingdom to kingdom is strictly dependent upon The Energy Circle ~ it is a decision made by The Energy Circle. Thus, that means that some of you as energies have already been in The Animal Kingdom ~ some of you as energies will go into The Animal Kingdom ~ and some of you as energies, have not chosen The Animal Kingdom to go into at all, you see ~ which does not preclude the possibility that at a future time, you would renegotiate with the grouping that you negotiated with originally, to include The Animal Kingdom in the progression of kingdoms.

So, first and most important it is to understand the place within the scheme of things, if you will, where The Animal Kingdom is concerned. They are coming, as a kingdom, from the past illusion known as Atlantis, with soul memories of being experimented upon. In the final days of Atlantis, humans in their arrogance, thought that it would be fun to crossbreed, if you will, humans and animals, and in their attempts to play Creator, if you will, tremendous imbalances occurred.

The Animal Kingdom and The Human Kingdom are out of balance with each other, which is of course, as you know from our perspective, no big deal. Out of balance is out of balance ~ it gives opportunities to play and decide what the game is that you want to play, and then play it. So, as a result of these experiments, which we will go back to in a while, The Animal Kingdom moved into this current illusion being owed, if you will use those words, by The Human Kingdom. One of the reasons you see so many animals, what you call domesticated, pampered, taken care of by humans, is the natural result of that type of balancing.

In this illusion, we find The Animal Kingdom using their knowledge that The Human Kingdom owes them ~ we know you find this hard to believe ~ by actually exploiting the energy of their human friends. We know you find that all very hard to believe that an animal would, in essence, try to blackmail, or hold you hostage emotionally, even physically. However, they are no different as an energy than humans are as an energy ~ they have highly attuned abilities to make that connection to the human. Any energy, by the way, encased in any form, has the ability to manipulate and hold hostage other energies ~ it is simply the way that it is ~ it is rather fun to watch actually.

Now then, we find ourselves at the end of this illusion, ready to go in to a new illusion, and The Animal Kingdom is ready to accept the fact that they will take on a very different relationship with humans. The residual of abuse that they have carried with them as a kingdom throughout this illusion is peaking, if you will. You see so much abuse of animals now ~ by humans, by other animals, but mostly by humans, so that the exaggeration can reach its fullest point ~ for the balancing that the two kingdoms entered into this current illusion with, is nearing its stability point.

The interesting part will be, moving into The New Illusion with animals who can more readily communicate with humans. The advances, if you will, quote, unquote, "advances," by your scientists in this illusion, have said, "Oh, oh, we have discovered something, that we can communicate with animals, by human standards, and so the great news is that some animals are more intelligent than other animals and may even have enough intelligence to be trained and taught how to communicate with certain humans."

When the shakeout of the starting up of The New Illusion is completed, the animals and the humans who are left will have an automatic sensitivity and understanding with each other ~ and there will be the Interdimensional Communication component that jumps into place, if you will. One of the underpinnings of The New Illusion is the ability to communicate and travel interdimensionally in a much more advanced way than is currently present on the earth plane. So, the animals will have a very different positioning, for in their ability to communicate easily with their human counterpart, there will be then interesting applications of experimentation that will occur.

Experimentation, by the way, is a good thing. It is only when abuses begin of experimentation, that the imbalance occurs, and as you know, we think imbalance is a wonderful thing, so to say that abuse is a wonderful thing in the metaphysical way is very different from what you might think in the concrete grounded way, "Oh, abuse, that is a horrible thing." Abuse is not a horrible thing ~ abuse is the way that the balance occurs. Not one energy can get out of never abusing, "Oh, I am wonderful, I have never abused, I have the attitude that abuse is unacceptable," and think yourself to be superior.

The way that you are able to reach a point of seeing abuse as something that you would not want to do is that you were there to begin with and work your way through it ~ as humans, as animals, as minerals, as carpet, as clothing, as trees, as wind, as blood within your encasement, as bone within your encasement. Every form of energy has its own issues of balance and imbalance, abuse and non-abuse. The goal is to bring it into a spiritual way of living for Self, which may, by some standards, still appear to be abusive. What you consider to be non-abusive may indeed be considered abusive by another who has moved to a higher understanding of abuse versus non abuse.

So animals, as a kingdom now, have moved into this teeter totter of stability. Soon it will be absolutely still ~ the balance. It will be still, ready to move into The New Illusion, completely balanced with The Human Kingdom, percentagewise. The percentage that was taken on for this illusion by The Human and The Animal Kingdom, out of the totality of lessons to be learned, has reached, almost, its balancing.

Now then, what happens once the percentage has been achieved and balance occurs? What is the natural progression?

It starts over.

Indeed, it starts all over again, because the percentage has been achieved, but the totality has not. It may be that only two percent of the totality between The Animal Kingdom and The Human Kingdom has been achieved and brought to balance and it is time to

take on another percentage for The New Illusion. So, going into The New Illusion, balance ~ the startup time of The New Illusion, balance is maintained ~ wonderful interconnections.

And then soon, the games begin again, and Playtime on the Earth Plane, which has been in recess, is about to start up again, the games of balance and imbalance begin again. Now for The New Illusion, The Human and Animal Kingdom have taken on a very large percentage of balancing ~ they have taken on what appears to be approximately ten percent, which is a high percentage to bring into any illusion. Generally kingdoms take on a much lower percentage for balancing between or among themselves, so there is a ten percentage of balancing here, which makes for wonderful playing.

Any questions thus far? (There is silence)

All right then, let us bring you back to Atlantis so that you can then see what the thread into The New Illusion is about. In the final days of The Atlantean Illusion, the powers that had been achieved by The Human Kingdom were very high in terms of mind control and in terms of use with The Mineral Kingdom. There was tremendous abilities, between the mind control and its application with The Mineral Kingdom, to abuse any one and any situation that they so choose. Remember that at the end of The Atlantean Illusion it was exaggerated just as it is exaggerated at the end of this illusion, in terms of the abilities and the exaggeration of abuse of those abilities.

So with the use of The Mineral Kingdom as a conduit, The Human Kingdom utilized The Animal Kingdom for what was called, in that time frame ~ from their frame of reference ~ a very perverse behavior of thinking that it was fun to breed human and animal together. Now obviously, this was part of the plan and thus it was able to be achieved, as you would call it, from a genetic sense. The ability to create more than one species into another is part of every illusion that is on the plane ~ the entire portfolio of illusions, if you will, has that as one of its abilities. Some illusions use it more than other illusions.

The Atlantean Illusion had it at a tremendously high level of abuse. In this new illusion, it will not be the humans who will experiment on the animals ~ it will be the animals who experiment on the humans, which will not occur, by the way, until about midway through The New Illusion. Many of you are off the hook ~ you will not be experimented upon by the animals who live with you now. It takes much more time to evolve, even though some of you feel like you are an experiment with your animal friends. ☺ ☺

What will occur however is that the animal, as part of this ten percent taken on, will attempt to bring balance to this experimentation that was given to them by the humans and to say to the humans, "You see, we bring balance to the treatment that you gave to us," for that treatment now is at a higher level of understanding, of course, into the ten percent component, which will then lend itself for the illusion after that in which the humans will once again have the opportunity to bring balance with the testing, if you will, of human and animal.

There is nothing wrong with dual species, by the way ~ it is rather interesting. Indeed, there can be more than two species brought together, as you would call it ~ we call it species, we call it kingdoms. It brings in a very interesting discussion of kingdoms, for as humans, you are composed of hundreds of kingdoms that make up the human encasement. The animal encasement is hundreds of kingdoms that make up the animal. There are some that are the same, The Blood Kingdom, if you would call it that, The Bone Kingdom ~ many of the same components that make up the human encasement, make up the animal encasement.

But even more interesting is that some of the dominant features of a kingdom can be intermingled to make them another kingdom ~ not called The Human Kingdom and not called The Animal Kingdom ~ but some other combination, which is what the Atlanteans were attempting to do. But rather than bringing it into what we would call the spiritual usage of that knowledge and ability to combine kingdoms, they saw it as a way to hurt others, to have power and control and laugh at the pain that they inflicted ~ mostly on The Animal Kingdom.

So then, it brings us into a discussion of what The Animal Kingdom is all about now, what has led up to where they are now, and what specific forms within The Animal Kingdom have as a major role into The New Illusion. Some appear to think that they are the crown princess ~ Arietta has the sense, very bright, yes, very gentle, enjoying the movement from human to human. There are many energies currently encased in what is an animal ~ in some cases in canine form ~ who have very highly developed awarenesses of Interdimensional Communication and will indeed take that into The New Illusion.

There will be a significant number of Animal Kingdom members, moving into The New Illusion ~ a higher percentage than the human encasement, a lower percentage than The Mineral Kingdom. The Mineral Kingdom will have the highest percentage of the three kingdoms, moving into The New Illusion. So you can see that The Human Kingdom, for all of its thoughts of superiority, will have the least amount, percentagewise, of those three kingdoms.

Now then, would there be any questions or comments before we continue?

I am curious about the different types of animals. There are a lot of extinctions occurring now and I was wondering if they are going to reappear differently in The New Illusion?

Indeed, the whales and the dolphins, as you know them, are a transition kingdom. We have placed this on the record, they are a transition kingdom between human and animal, for those who are moving into The Human Kingdom from The Animal Kingdom and those from The Animal Kingdom moving into The Human Kingdom.

It is a shock to go from one into the other in either way, and these two particular ~ they are not considered animals. They are their own kingdom ~ they are not part of any kingdom that you would call on the plane, they are not fish ~ they are not anything but themselves. The number of types of animal members will change dramatically. There will be far more types of animals than currently on the plane. Each illusion has its own

description, if you will, of the types within each kingdom. So The Human Kingdom has its types, it has its different forms, if you will, which will change in The New Illusion ~ that is for another discussion.

The Animal Kingdom will have significantly more types. Many that are currently on the plane will not go into The New Illusion. They will stay, if you will, in the storage area of this illusion. Some forms of kingdoms move from one illusion to another, other forms of kingdoms stay behind and work only in one illusion, and some forms of kingdoms select three or four or ten or twenty illusions, and work within those illusions. So some illusions have more animal members, for example, than other illusions.

Those that have chosen to move from one illusion to the next, change form, just as humans will be changing form from one illusion to the next, and in this particular illusion, you have begun to see that some animals are no longer in existence ~ they have gone into storage, if you will, as an energy grouping. You see that the appearance of what seems to be new animals, they are part of this transition into The New Illusion. And you see deformed, or what appears to be deformed animals, they are simply beginning to change form as they move into the next illusion, for they are part of a continuing thread of form within their kingdom, from one illusion into the next. Humans are changing form and have been for the last three hundred to five hundred years since the beginning of the end, if you will, of the current illusion.

You can see it, it is not discussed all that much, for there is fear among those who are observing these kinds of changes. They are afraid of what it means ~ and all it means is that form is changing. There are humans who are, for example, both genders. There are humans who are neither gender ~ and all of the variations that are about to enter in. So, too, will the animals have these gender complications, if you will. And it is as The New Illusion moves into its fullness, this testing of the animals now with the ability to, first of all, communicate with humans and secondly, to appear to want to help humans with their own genetic challenges.

What do you think that means, what we have just said?

They are helping us with different kinds of issues.

That is a part of it, yes. It is a part of it. What is this whole arena of genetic challenges? We have just stated that humans will have the ability to have both genders, no gender, or any shade therein. Think about this now.

Understand how it works, the process so, kind of, the next step, working on humans, working without abuse.

Oh, but there will be abuse. It must be. It must be, in order to bring it into its balance. Humans are cloning animals now. What do you think, if animals and humans are taking on a higher percentage of balancing in The New Illusion, what are some of the implications of that?

Animals cloning humans!

Indeed, but it will be under the appearance that it is the animal, indeed, that is helping the human ~ this is what the attempt to balance is about. There will be abuses ~ imagine trying to clone a human with animal genetics. The Animal Kingdom has the ability to bring a sense of soothing and comfort to The Human Kingdom, and then again, they can bring a sense of just the opposite, depending on the kind of balancing that is occurring between the human and the animal energy.

The Animal Kingdom, inherently, has the ability to heal, far greater than The Human Kingdom ~ healing being a facilitator in healing. Only Self heals Self, but they have a much higher advanced energy management within their kingdom than The Human Kingdom has. They are able to heal themselves to a much greater degree than humans are able to and they are able to help each other within the kingdom to heal themselves ~ within The Animal Kingdom ~ to a much greater degree than humans are able to help each other heal. There is a higher level of Unconditional Love, if you will use that word, within The Animal Kingdom.

The Animal Kingdom has a very high ability to bring a sense of harmony into a human gathering. Now we have only mentioned in passing, if you will, The Mineral Kingdom. We have said that there is a triad here, if you will ~ The Mineral Kingdom, The Human Kingdom and The Animal Kingdom. The Mineral Kingdom will be taking on some very interesting forms in The New Illusion ~ the way in which they present themselves. They will, in some cases, appear much like you would see a tree growing ~ The Mineral Kingdom will appear in that particular form.

There will be Mineral Kingdoms that serve in the arena of hospitality where you are able to actually go into a Mineral Kingdom type of environment much more so than currently on the plane. It will be much more common to have what you might call, at least in this illusion, caves that are havens ~ that are healing receptacles. You will be able to enter into that type of situation with The Mineral Kingdom. However, The Mineral Kingdom will be working closely with The Animal Kingdom in the next illusion ~ not as much with The Human Kingdom.

The Animal Kingdom will be the determinant as to the type of connection The Human Kingdom has with The Mineral Kingdom. So for example, if you wanted to go visit the cave or the house of The Mineral Kingdom that is existing in the geographic area that you live in, you will only be able to gain entrance to that if you have an Animal Kingdom connection. So that will be the determinant in terms of your own human abilities to communicate with The Mineral Kingdom ~ it will now have The Animal Kingdom as an intermediary between the two kingdoms.

Why do you think this type of situation has created itself?

The balancing, because The Human Kingdom, in particular, at the end of this illusion and also in Atlantis, feeling so superior. So we need to balance and get off our high horse and not feel so superior.

Yes, that is very much the essence of what is occurring. It is time for The Human Kingdom to place itself in perspective with other kingdoms, even though it is inherent in

the human experience to feel superiority. In order to get out of the human experience, there has to be the final understanding and acceptance and comfort with the fact that the human is only one of hundreds and hundreds and hundreds and thousands of experiences in kingdoms. It is deliberately set up that three major kingdoms ~ most visible kingdoms on the earth plane, Human, Animal and Mineral ~ are played off against each other, if you will.

By the time this next illusion begins to come to closure, it will be The Mineral Kingdom or perhaps The Animal Kingdom, depending on how they work out their balancing, that will begin to feel that they are superior to the other two kingdoms. So, The Animal Kingdom will begin to feel that it is superior to The Human Kingdom, or The Mineral Kingdom will begin to feel that it is superior to the other kingdoms ~ and thus additional balancing has been set up for the illusion that will follow the next one. It is all part of a long term illusion strategy, you see.

Percentages are taken on by one kingdom with another, such as the animal and the human. But The Mineral Kingdom is serving as that kind of catalyst to see what kind of balancing can actually come about as a result of realizing that suddenly The Animal Kingdom appears to have a greater ability and connection with The Mineral Kingdom than The Human Kingdom.

What do you think?

It is like the abuses humans used in Atlantis, with The Mineral Kingdom, they used that as their tool, so now the animals get the tool

Yes, indeed, that is exactly the insight, my love, that is occurring here. The user of the tool becomes the tool, oftentimes. So you see, because The Animal Kingdom is able to communicate directly with The Mineral Kingdom, as well as The Human Kingdom, The Mineral Kingdom may now allow The Animal Kingdom to use it as a tool toward The Human Kingdom.

But then of course, there will be an interesting little battle that goes on as to who will be the tool and who will be the user of the tool. This battle will begin at about mid-point in the next illusion that will bring it to the exaggeration at the end of the next illusion. There is the battle now that goes on between the three kingdoms. Some have greater abilities ~ animals very easily can manipulate, as we have indicated. However, some humans are not easily manipulated by animals, but can be easily manipulated by The Mineral Kingdom.

The Mineral Kingdom, remember, is not just pretty little rocks and crystals that you see ~ that is only a part of The Mineral Kingdom. The Mineral Kingdom is what makes your computers function and you know how controlling the mineral members in those particular forms can be.

So, what contemplation have you now with this information that we have given?

It just looks different.

Is it something that you think would be feared by humans?

By some, but maybe those are the ones who choose not to go into The New Illusion, or struggle through that transition and decide not to stay, or something. In general, I see people now that it is evidence of their fear of animals. The delivery person and the dog in the yard, and the dog is wagging its tail, and it looks so happy, and I am thinking, "Oh, what a sweet dog," but the delivery person is plastered against the truck. Many people still fear animals that are domesticated, generally accepted, but there is still a big fear of animals.

And will that automatically go away once the next illusion comes?

Is that a guess, do we guess?

You could perhaps comment on the question.

It would be nice, but it probably won't happen entirely.

What happens from one illusion to the next in terms of the lessons that all energies have in their Toy Box?

We carry them over.

Yes. They are carried over, and they just look different from one illusion to the next. So understand that at the beginning of any illusion, there is that startup time when there is relative harmony, there is never complete harmony ~ relative harmony. Only certain energies from any of the kingdoms are able to come in at the startup of a new illusion, which can be anywhere from five hundred to a thousand earth plane years. So all of those energies, let us be specific, The Human, The Mineral and The Animal Kingdom, who at the end of this illusion, are not vibrationally ready to go into the beginning of a new illusion ~ they go off and do something else.

When the illusion is ready, then, to begin accepting again energies that were not ready to be the startup energies of The New Illusion, those who at this point in the illusion, had fears for animals, for example, will once again be allowed to come back onto the earth plane. It may be a thousand years from now and there is a new order, if you will, as we have described it.

Yet they are coming in to an experience on the earth plane with Soul memories that kick back, if you will, to this point in this illusion ~ they have not had any benefit of the startup of harmony, or the transition. So they come in, bang ~ from one illusion to another ~ from one lifetime to another ~ just as the Atlanteans have been doing for the last ten thousand earth plane years, as the attempt to balance their own lessons of experimentation in Atlantis, with experimentation in this lifetime. There is the ability and opportunity given to enlarge their awarenesses in this lifetime, in this illusion ~ so too will that simply move into the next illusion.

Those who have the same fears and unresolved issues in this illusion, regarding animals, for example, will find themselves, perhaps, in their very next lifetime in the next illusion, where animals have evolved into a different relationship with humans, as we have

described. Then, simply contemplate the complexities of that. And more and more humans and more and more animals that would go from one illusion to the next, that had to wait until it was an appropriate time to go in to an illusion, and the minerals who also had to wait until it was an appropriate time to go into the next illusion, are coming in with what you call their baggage ~ their memories of the way they felt and the way they behaved in this lifetime, or in lifetimes in the past five hundred to one thousand earth plane years, or even earlier in this illusion. They are bringing back into the next illusion this memory. What happens then?

A lot of fear, a lot of balancing.

Yes, indeed.

They put humans on leashes. 😊 😊 (Much chatter)

Yes, indeed, not quite as extreme as what you make reference to, at least for the next illusion. There are illusions in the portfolio that have very different configurations of dominance ~ we will leave that for another time.

What questions would you have?

I have a question about how we are treating the animals now and karma ~ how that plays into, obviously good treatment now. Will we be able to access that communication thing and our favorite pet, then? I mean ~ I am not really sure of the ~ I hate to think that I am going into this blind ~ I will be subjected to all kinds of animal torture ~ I had a different idea about the pets going on now.

As you would refer to them as pets in this illusion, they too will then refer to you as a pet in the next illusion. Within their own realm of communication, they already do that. They will be able to communicate that in a much more concrete way.

The use of the word karma, my love, is one that we understand is used by many on the plane now to understand that what they say is debt owed ~ what you do now comes back to you. When we make reference to that type of concept, we use the word balancing ~ so in our vocabulary, we simply translate that. We would make that a point in this particular discussion so that those reading the material would understand that we use the word balance instead of karma ~ it is the same thing ~ we like the sound of balancing better than the sound of karma. Karma has what we think is a harsh sound and also, perhaps, takes away a bit of the understanding at higher levels of the concept, where one simply brings balance into one's lessons, rather than think that there is an either or, and thinks, "If you act good now, then you will get good in the future, and if you act bad now, you will get bad in the future."

Understand that good and bad are relative terms, and what you might be thinking is good behavior may not be in terms of the total balance that you as an energy have taken on, whereas specifically an animal is concerned. You may be treating an animal in this lifetime very well and think that, "A-h-h, I am treating this animal well so, therefore, I will always then, have good treatment from animals in the future, because that is what I have done in this time frame." From a very simplistic standpoint and for many who have

that basic understanding, it works ~ that is a way of at least appreciating that actions follow actions.

However, in the expanded view that we are presenting, understand that you may be behaving, what you call good in one lifetime, and in the next lifetime, you are bringing balance, so you are at the other end ~ or the other part of the teeter totter. So in this life, you are good, the next life you are bad, and in the next life, you are good ~ but in a different percentage. And in the next lifetime, you are bad, but in a different percentage ~ so the way you are behaving in this lifetime is not definitive. If you are bad in this lifetime, whatever that happens to be defined as, and you look at others around, and you say, "They will get back what they deserve," you do not know where they are in their own balancing ~ this may be a lifetime in which they are at one end versus the other end, whether it is so called good or bad, you see.

So, what you need to be concerned about is that whatever the flow of your lifetimes happen to be, that you connect in this lifetime, through your meditations, to try and determine how you are fitting Self into the flow of your lessons to be learned with The Animal Kingdom. For example, with every kingdom this is true, but we speak of The Animal Kingdom in this lifetime, so if you are having a very harmonious lifetime with an animal, do not automatically assume that will continue into other lifetimes. If you are having not such a harmonious lifetime with an animal, at the same time do not assume that will continue into another lifetime.

It could be the rest of the balancing of a percentage.

Yes, that is the point. You do not know where you are in the balancing and a certain percentage, and remember that your percentage within the total percentage of The Animal Kingdom and The Human Kingdom will be different. So you may have within this coming illusion of ten percent that The Animal and Human kingdom have determined, as kingdoms, will be balanced. You may have only one tenth of one tenth of one tenth of one percent that you have decided to use within the next illusion. That, then, determines greatly the amount of even interaction that you would have with an animal.

There are some humans who will have no interaction with animals ~ it is not part of their path. It is not all Animals, Humans and Mineral members, while connected as a kingdom ~ the three kingdoms in a triad ~ does not automatically mean that you will associate with one or both. There are many humans currently on the plane who have no interaction with animals, who have minimal interaction with minerals ~ they have not chosen it as part of their Toy Box. It is not part of their Energy Circle, for the interaction that they would have with an animal would be in passing, it would not be in any way, connected, simply passing, as you would pass any energy, "Oh, nice energy," no balancing going on, however.

So there are many animals and many humans who are not balancing with each other, they have not taken that on, and that means that they will not take it on in The New Illusion if they are part of that group destined to go into The New Illusion. There are also many on the plane now ~ Animal, Human, Mineral ~ who will skip the next

illusion completely, for whatever their reasons ~ they will not even go into the next illusion.

You pick and choose your illusions ~ that is all part of the grand plan. So whatever it is that you may have decided to balance with The Animal Kingdom may, not be part of what you plan to do for the next illusion ~ you bypass it completely. You either skip the next illusion so that you do not have to deal with what has been set up for balancing by The Human and Animal Kingdoms, or you go into the next illusion, but you have eliminated playing with that toy from your Toy Box ~ for the next illusion. You absolutely have no connection with animals or minerals. It is all very self-selected. You can do whatever you want to do and it is always, of course, the other layers of Self in conjunction with each other that determine this along with the Soul that monitors it all, of course.

Wow! 😊😊

Wow! You would expect anything less?

Of course not!

It seems like there is a perpetuation of things that are being learned and are being brought over, so I don't understand. It just seems that at some point, we shouldn't have to balance as much as we learn more, or we should not have to be participating in those kinds of things, no matter where we are in terms of the percentage?

That is correct, my love. As you balance, you participate less and less in the activities that are out of balance ~ that is what happens ~ and as you participate less and less, you participate less and less. There is always the Universal hook that grabs you and says, "Let's see how much you really have learned," and present an opportunity to Self to prove that you have indeed reached that point of balance, to stay. You may regress ~ regression is not bad. Regression simply means that, "I thought I had balanced, I thought I had brought awareness, but apparently not ~ so, I'm back in this arena of abuse because I have to learn something."

Even the most balanced of energies, percentagewise, may deliberately choose to go back into an arena of imbalance and abuse to be certain that they have truly learned the lesson meant for them to have learned. And so it becomes a choice, all the time, and you can choose to go back into an abusive situation even if you have reached a point of balance.

Understand that you may have taken on a series of lifetimes with an Animal member, where there are lessons that you are learning, back and forth, but it was one percent out of a total that you have chosen. The total is always one hundred percent, however, that one hundred percent that you choose may only be ten percent of the greater total of lessons to be learned. So it is, however, applicable to your percentage ~ your percentage is one hundred percent, and it is as intense as one who has taken on a higher percentage of that.

So, in one series of lifetimes, you have decided to take on one percent of the balance, back and forth, back and forth, and you balance ~ a-h-h, one percent. You still have ninety nine percent left. You may decide that you will go for three or four illusions ~ full illusions ~ before you go back into your Toy Box and pick out that balance again ~ that lesson. You have ninety nine percent, and you say, "A-h-h, now it is time to revisit this and do some balancing with the animal."

Then you go back into abuse and imbalance as it pertains to that percentage, for now you are in a cumulative mode. And as you accumulate balance ~ and let us say you have balanced fifty percent of your one hundred ~ each time you take on another percentage, it means that you have to once again prove that the other cumulative percentage is stable, you see. And that is why there will be this going back into the abusive mode, even though you feel that you have balanced and why would you want to go back into that, "it feels good now, why would I want to go back?" into what you would call bad.

That is the simple, clear cut explanation.

It seems like there are some indicator animals on the planet now that are showing us the consequences of some of the things that we have been involved in and in a way it seems as if they are asking us to wake up to the consequences. When I see suffering going on, I'm not sure what to do. I know about sending love and light and not imposing. Would you comment on this?

Your observations, my love, are part of the entire issue of balancing and the understanding that each energy has its own path, first and foremost, and its own connections with others. You may have a particular mission where The Animal Kingdom is concerned, that in this lifetime you save them ~ whenever you see one, you attempt to save them ~ whatever definition that would take on. Another energy would not have that kind of mission and they would see the same situation and not respond to it.

There is nothing wrong with the fact that someone does not respond to the suffering, for example, of an animal ~ there are enough others who have taken on that particular role who would respond. And also there is an intermingling of lessons involved here that you cannot even begin to try and sort out. An animal, for example, who is suffering, would more than likely not be presented to a human who did not even have that as an issue, for there would be nothing to balance, you see ~ there would be no reason. Therefore, an animal who is suffering would find itself suffering in the venue of those who have taken on that issue of responding to suffering animals, for example ~ just as a very specific thing.

Whether the human would respond to the animal is where the balancing comes in. You as a human have taken on the path of responding to animals who are suffering. One is presented to you in whatever way ~ however that opportunity is presented. You then have the choice of either responding or not, and that is part of the balance, you see. It has nothing to do with whether you are a good or not good person ~ it is an understanding of the greater issues that are involved.

Even if you have not the path of the suffering animal, and for some reason you are brought into the arena and you do not respond to the suffering animal, you may in fact simply say, "Ah, I send light and support to this animal." And it is at the higher level that

you would give some response because you may just have that type of energy within you. Another person, human, would look at the same situation, being brought in for one reason or another into a suffering animal, and say, "I have nothing. No, I will not do anything. I will not send it light. I will not do anything." That is all right.

Not everyone has to send light to everyone and every energy ~ that would be an incredible overload of light, and you know, everyone has their path that they have chosen ~ they are different, they are complex. What concerns you does not concern other people. Every one of you have very different concerns about the world around you, and that is appropriate and you must not judge others who do not have the same concern as you do. Simply say, "I understand, you have the right to feel that way, I have the right to feel my way." Do not think that there is negativity because one is better than the other. That is not the case.

Animals bring that out in The Human Kingdom. There is such an awareness on the earth plane now about the abuse of animals, which has been set up ~ that is the way it was meant to be ~ "If you eat an animal, you are bad" ~ that has absolutely no foundation. What about eating a vegetable? It is the same thing ~ you are consuming the form that once housed energy. So what? To say that you must be eating no animal in order to be spiritually evolved is one of the things that the elitists on the plane now project, "You must eat only certain things if you are to show that you are spiritually evolved." You are eating, you are consuming air ~ you are eating when you breathe ~ it is the same. But The Animal Kingdom has actually created for itself a very good position, "Do not eat us ~ eat the others ~ make it seem like you're picking on us, you're abusing us because you eat us." ☺ ☺

Now there certainly are issues relating to the abuse of the encasement of an energy, of the animal, just as there would be the abuse of the human encasement. The animal attacks the human and hurts the encasement ~ actually creates such an attack that the human energy, the energy in the human encasement, breaks down and departs. Certainly, the skinning of humans is in the same arena as the skinning of animals ~ and the skinning, by the way, of The Mineral Kingdom ~ these are the issues of balance, but certainly not to look at a situation and immediately think that this human is bad ~ you have to look at the totality.

Just as we answered your question, my love, about karma, the balancing ~ one is skinning an animal in this lifetime. Well, what might have happened in other lifetimes between the animal and the human involved, not just in this illusion but perhaps when the next illusion that you are about to enter into, was last on the plane. You see, we bring in another twist.

The Portfolio of Illusions runs through every million earth plane years. And so what is being set up in the next illusion, as we have described to you, about midway through the illusion, you may have been a participant in that lifetime where the animal skinned you, you see. And this could have happened millions and millions of earth plane years ago. And now you are back in this illusion with a memory from millions of years ago, where you were skinned by this particular energy who happens to still be in animal form and you are still in human form, and it is your turn to skin the animal, until you finally, both

of you, reach a balance where you say, "I guess we don't want to skin each other anymore." And that is when the balance begins to occur. This can go on for millennia ~ there is no time frame.

Some are on the plane for eternity, or what might appear to be eternity, and they decide that they will balance with an animal every few million years. Another will say, "I want to get this done and over with. There will be no skinning," as an example. Certainly, what you call cannibalism, where you would put a human being, kill this human being and eat the human being, as a human, the animals have the same type of situation, and yet no one seems to think that this a bad thing, "Oh, animals are just doing what they do, they kill each other and eat each other."

That is a mentality, if you will, that comes from The Animal Kingdom, though it is the same thing in The Human Kingdom ~ kill your own kingdom, and consume it. There is nothing bad about that in the long term. It is a balancing where you finally start saying, "A-h-h, we will stop this interkingdom attack on each other." But then, if you do that with the animal, you say, "A-h-h, we will no longer eat animal," what are you going to do? Go after something else. It is simple, as do others come after humans. Humans are consumed by those energies that you are aware of, at concrete, and by interdimensional activity of other energy forms that consume human, just as you would consume anything else.

I guess I feel that animals do a lot in terms of helping people with their hearts and with their emotional understanding.

That is appropriate for you, my love, because of the path that you have taken, and the perception, then, that you would have of The Animal Kingdom and what you would attract to your energy field where The Animal Kingdom is concerned. Someone else would have very different issues that they would be dealing with and may indeed have animals attracted to them, but animals that create disharmony and not harmony as you are experiencing. So yes, it is appropriate you would feel this way.

Here is an example of a gentle, loving animal energy at this particular point in its path, you see. (Waith refers to Arietta) What you see is this lifetime ~ in another lifetime, you will see something entirely different from this energy, just as this energy would see something entirely different from you in another lifetime, as a human.

I know that it is part of the whole Universal show that maintains everything, but it makes me a little sad about the balancing going on. So it takes both members that are participating to decide that it has been enough abuse?

That is exactly it. It is between the two, or among the group. And there is no reason to feel sad, for when you feel that sadness, you are implying that there is perhaps a victim here, "Ah, the poor animal." There is nothing poor about the animal. It is what the animal has decided to take on. It is what you have taken on in whatever interaction.

It is not to say that you do not feel for the pain that the animal has, but it is the path, and at the higher levels, there is the complete harmony of it. To feel sad for someone who is experiencing their path degrades the path that the entity has taken on, for you are

saying, "You have no control over what is going on." It does not mean that you do not feel for the path that another has taken on. But certainly, you have your own path to be concerned about, and if it is to feel sorry or sad, then that is appropriate, but do think that another must also feel the same way as you do, you see.

You mentioned about the caves for the minerals, and we have to go through the animals to get into the cave. That seems to me like setting up a discrimination type of thing. Like how would you go about getting that connection? You mentioned some people don't have The Animal Kingdom in their Energy Circle, so we wouldn't necessarily have that connection there already.

Oh, well!! ☺ ☺ ☺

I was just wondering how that would play out.

All things for all people does not exist, unless you have taken on all things, and that is an entirely different discussion. You would be out of the One forever, literally, you see. And so what?

I was wondering about the animal connection, how we would go about making that animal connection.

You simply say that you want to have an animal connection. You renegotiate with The Energy Circle. You say, "Let us bring in an animal." Everybody has to agree, you bring in an animal and you have it. It is as simple as that.

The energy comes in for free.

That is always a joy to watch, as the energy tries to harmonize, or even better, tries to renegotiate. Sometimes the elimination of a member from The Energy Circle, and again the addition of an energy into The Circle is fun.

Does it have to be a physical animal, or can it be a member of a spirit animal?

We will address that in our next gathering ~ the discussion of the kingdoms, Animal in this case, and Human, in other dimensions of itself. A wonderful ending now to what then will be the opening for the next Animal Kingdom discussion, for we have only addressed essentially the concreteness, the concrete that you find yourself in now. Our next discussion brings in the abstract of the kingdoms.

We send you the very Highest of the White Light from the very Highest of the Kingdom of Amelius. Farewell, my loves.
